

What will be charged for shipping?

Costs are based on the weight of your order. This is the most accurate and fair way to calculate shipping. Find your country in one of the shipping zone tables on page 2 and determine the weight of your order using the table below.

We aim to keep shipping costs as low as possible for our customers and always pay a part of them for you. Keep in mind that parcels including fenders can be quite big and heavy which increases shipping costs.

- Please note that bracelets are shipped free worldwide.
- Shipping to the Netherlands, Belgium, Luxemburg and Germany is free.
- Our keychains can not be shipped for free as they do not fit in your mailbox! :).

Questions? hello@nautiqo.com
